PARAS PARANI

parasparani@gmail.com ~ 551-229-2318 ~ https://www.linkedin.com/in/paras-parani ~ https://github.com/Paras1242 ~ Miami,FL

EDUCATION

Masters Of Science - Computer Science (3.78/4.0 GPA) **Aug 2023 - (Expected Grad) May 2025**
Florida International University; MIAMI, FL
Bachelor of Technology - Mechatronics (3.71/4.0 GPA) **Aug 2018 - July 2022**
Symbiosis University of Applied Sciences; INDORE, MP

SKILLS

***Programming Languages**:* Python(2 yrs), JavaScript, SQL, NoSQL
***Relevant Courses**: Advance Topic in Machine Learning*, Database Management Systems and Data Structures & Algorithms
Version Controls & Other: Git, REST API, Pytorch, Numpy, Pandas, Matplotlib
Framework: Django
***Statistical Packages**:* Matlab, R programming
***Automation Tools**:* UiPath

EXPERIENCES

Florida International University | Miami, FL, USA **November 2023 - Present**
Student Digital Assistant

- Collected, cleaned, and analyzed finance data using python libraries like pandas, shortening **analysis time by 50%**.

Ignatiuz Software Pvt Ltd | Indore, India **Sep 2021 - July 2023**
Senior Associate

- Spearheaded a Python-based deepfake video project, employing advanced machine learning algorithms to produce highly accurate deepfake videos, improving model **accuracy by 40%**.
- Developed and enhanced the user interface using Tkinter for the deepfake tool, resulting in a **30% increase** in user engagement and accessibility.
- Upgraded Scoutfoto project using **Django**, implemented **APIs**, deployed on Azure, improving **efficiency by 80%**.
- Innovated UiPath-based automation for 5 clients, **automating 60%** of repetitive tasks and cutting process time by 25%.
- Promoted to Senior Associate in 1 years from Web Developer.
- Promoted to Web Developer in 8 months from Junior Web Developer

CSDG Technologies Pvt Ltd | Indore, India **May 2020 - July 2021**
Software Developer Intern

- Conducted in-depth research on backend frameworks (**Django, Flask, Node.js**) and databases (**SQL, MongoDB, PostgreSQL**), leading to their strategic adoption and cloud platform evaluation (**AWS, Azure**), enhancing system **efficiency by 20%**. Implemented a Django backend, optimized database design, and developed APIs, boosting system **response time by 50%** and enhancing user experience.

PROJECTS

Phishing Email Detection Using Machine Learning | Miami, Fl, USA **November 2023**

- Employed Random Forest and TF-IDF Vectorization for Accurate Phishing Email Classification.

Object Detection Using Pytorch | Miami, Fl, USA **September 2023**

- Implemented an object detection project using the PyTorch **resnet_fpn_backbone** model.
- Combined ResNet architecture with Feature Pyramid Network (FPN) for enhanced image recognition.

CERTIFICATIONS

Machine Learning A-Z | Online **August 2022**
Quantum Computing and Programming Diploma | Online **October 2021**
Industrial Training on Embedded System with IoT | Indore, India **July 2019**
